Members Open New Independence Home for Tours

The Rasmussen family and ECI REC invite you to a Model Home Open House! This all-electric, energy-efficient home exhibits state-of-the-art technology in the areas of environment, indoor air quality, and energy efficiency.

The home features water-to-air and water-to-water geothermal heat pumps. This highly efficient system qualifies for excellent rebates and is eligible for the Geothermal Federal Tax Credit.

The potable hot water for the home is generated by an electric hybrid heat pump water heater and a desuperheating water heater tied to the geothermal system. The indoor air quality is controlled by a heat recovery ventilation system. The home also has provisions for a radon abatement system and a sealed sump pump.

The exterior walls are constructed of Insulated Concrete Forms (ICF). The attic insulation is a combination of blown-in cellulose and closed-cell spray foam. The windows are gas-filled, triple-paned, and low-emissivity. All major appliances are ENERGY STAR®-rated for optimal efficiency. The home also features ENERGY STAR-rated LED light fixtures and multispeed ceiling fans.

This event is a wonderful opportunity for our members and the public to experience an energy-efficient living space. ECI REC and numerous contractors will be on hand to offer their expertise and answer any questions you have.
