

AGRICULTURAL REBATES

VENTILATION AND CIRCULATION

Farm animals require ventilation and air movement for comfort and productivity year-round. Rebates are available for high efficiency systems that could help save energy costs of up to 30% a year.

Ventilation and Circulation Fans

The operating costs of a ventilation system will depend on the efficiency of the equipment, configuration of the fans, proper installation and control over the amount of airflow.

| | |
|--|-----------|
| Ventilation Fans (fan blade diameter) | \$3/inch |
| Ventilation Thermostat Controller with Humidistat | \$25 each |
| Circulation Fans (fan blade diameter) | \$1/inch |

Ventilation Fan Efficiency Requirements

(must be BESS Labs rated at 0.10 in. static pressure)

- 14-23 inch - min. 10.5 CFM/Watt
- 24-35 inch - min. 13.0 CFM/Watt
- 36-47 inch - min. 16.5 CFM/Watt
- 48-49 inch - min. 18.5 CFM/Watt
- ≥ 50 inch - min. 19.5 CFM/Watt

Circulation Fan Efficiency Requirements

(must be BESS Labs rated at thrust/kW requirements)

- 12-23 inch - min. 11.0 lbs. thrust/kW
- 24-35 inch - min. 15.0 lbs. thrust/kW
- 36-47 inch - min. 18.5 lbs. thrust/kW
- ≥ 48 inch - min. 23.0 lbs. thrust/kW

Rebates are limited to \$5,000 per account for all ventilation and circulation equipment.

VENTILATION AND CIRCULATION

High Volume Low Speed Fans

- High Volume Low Speed Fans \$35/ft.
Must be a ceiling-mounted fan with a diameter of 10' or more. Rebate is based on fan blade diameter in feet.

MacroAir

Research has shown that a cool cow is a productive cow and that milk production increases up to two pounds per cow when they are in a comfortable environment.

Energy-efficient HVLS fans keep cows cool by moving air more efficiently through barns and open-air sheds while keeping bugs, birds and dust under control.

EAST-CENTRAL IOWA REC REBATES

Contact the cooperative for the complete list of rebates and qualifications

DAIRY OPERATIONS

Energy-efficient equipment and technologies can go a long way in helping to reduce energy expenses and improve productivity.

Dairy Heat Reclaimers **\$5 per milking cow**
Heat reclaimers can reduce water-heating energy usage by 60% to 80% by recovering the heat discharged from dairy refrigeration equipment.

Dairy Milk Pre-Coolers **\$4 per milking cow**
Reducing the temperature of milk with “pre-coolers” helps reduce refrigeration system energy costs by 20% to 30%.

Variable Speed Dairy Vacuum Pumps **\$40/horsepower**
Variable speed drives (VSDs) used with dairy vacuum systems can reduce electricity use by as much as 60%.

Dairy Scroll Compressor **\$250 each**
Refrigeration systems with scroll compressors are 15% to 20% more efficient than traditional reciprocating compressor systems.
(must replace reciprocating compressor)

The maximum rebate is \$2,000 for each equipment type.

LIVESTOCK EQUIPMENT

Livestock Waterers
Rebates are available for efficient waterers with tanks constructed of plastic, a minimum of 2 inches of insulation and lid covers.

Electric Heated Livestock Waterers **\$50 each**
(≤ 175W per trough opening)

Farrowing Equipment
Efficient heating pads and controllers help reduce energy use and improve animal health.

- Single Crate Heating Pads **\$25/pad**
(≤ 85W)
- Double Crate Heating Pads **\$50/pad**
(≤ 170W)
- Heat Lamp or Pad Controller **\$50/controller**

LIGHTING

According to the U.S. Department of Energy (DOE), the annual electricity consumption of all indoor horticultural installations is about 5.9 terawatt hours, approximately equal to the annual usage of more than half a million U.S. households. Consumption is estimated to grow as much as 25% by 2025.

Horticulture LED Lighting

| | |
|--------|--------------|
| 8-14W | \$10/fixture |
| 15-49W | \$15/fixture |
| 50-99W | \$25/fixture |
| ≥ 100W | \$40/fixture |

Horticulture lighting must be classified as such in DesignLights Consortium to qualify.

Maximum incentive is 50% of installed costs. Custom rebates may be available; contact your cooperative for further details.

WHY ENERGY STAR OR DESIGNLIGHTS?

ENERGY STAR and the DesignLights Consortium™ have developed product lists to identify quality LED lighting products that meet certain performance criteria.

ENERGY STAR and DesignLights qualified products have been tested to verify that they perform as advertised and that required safety certifications have been obtained.

This means consumers can purchase these products with confidence and know they are likely to last longer and perform better than non-listed products.
