## Terms and Conditions - ENERGY STAR® Air Conditioner Incentive

**Program Offer:** The Program covers products purchased and/or services rendered on or after January 1, 2024.

### Equipment and Installation Eligibility Requirements:

1. All air conditioners must be ENERGY STAR® labeled and meet current Energy Efficiency Criteria for ENERGY STAR® qualified air conditioners. Current ENERGY STAR® information and specifications can be found at [www.energystar.gov](http://www.energystar.gov).
2. The minimum SEER2 and EER2 efficiencies on this form are the minimum values required for ENERGY STAR® qualified equipment at the time this form was published. ENERGY STAR® requirements periodically change and the Member is responsible to ensure that their system meets the current ENERGY STAR® criteria in effect at the time of installation.
3. Members must provide a copy of the receipt to verify equipment installation. Invoices should contain size, efficiency and model and serial numbers for all equipment.
4. A maximum of two (2) air conditioner rebates per residence is allowed.
5. Must provide copy of AHRI certificate.

### Specific Requirements for Central Air Conditioners

Most residential air conditioning systems are split systems that consist of indoor and outdoor equipment with a SEER2 (Seasonal Energy Efficiency Ratio) that has been determined for each matching assembly. To be eligible, both a new outdoor unit (condenser) and a new matching indoor A-coil (evaporator) must be installed.

The AHRI (Air Conditioning Heating and Refrigeration Institute) certified SEER2 for a matched split system must be verified and meet the minimum efficiency required for the appropriate incentive (see table below) regardless of whether the system is listed or labeled as ENERGY STAR. An ENERGY STAR® label on the outdoor unit does not ensure that the installed system, which also includes the indoor evaporator coil and blower assembly, meets ENERGY STAR® requirements for central air conditioning equipment.

The installing contractor should provide the homeowner with the SEER2 and EER2 rating for their specific system. These ratings for matched equipment should also be listed in the online AHRI Unitary Directory at [www.ahridirectory.org/](http://www.ahridirectory.org/).

### Locating ENERGY STAR® and Ultra Efficient Central Air Conditioners

From the Consortium for Energy Efficiency's (CEE) website you can search a database for ENERGY STAR® qualified equipment. This database contains AHRI certified ratings and is located at [www.ceedirectory.org/](http://www.ceedirectory.org/).

### General Terms and Conditions

Rebates shall be pro-rated based on the percent of power supplied by the utility if the customer has distributed generation.

**Application Information:** Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Utility reserves the right to verify sales transactions and to have reasonable access to the Customer's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

**Warranty Information:** The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

**Limitation of Liability:** The Utility's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Utility be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

**Participant Certification:** Participating Customer certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Utility. The Customer agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Utility's rules and qualifications, the rebate amount may be denied or adjusted.

**Program Changes/Termination:** The Utility reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

Customers must apply for rebates within six (6) months of the purchase date (as shown on the Customer's invoice) and are subject to the current year program offer if received after January 31st. Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.

Residential Air Conditioner Incentives			
Product Type	Minimum Efficiency		Rebate
	SEER2	EER2	
<b>ENERGY STAR® Central Air Conditioner (split system)</b>	<b>15.2</b>	<b>12.0</b>	<b>\$100</b>

SEER (Seasonal Energy Efficiency Ratio) and EER (Energy Efficiency Ratio) ratings for central AC units must be published in the AHRI Unitary Directory. Ratings for matched assemblies should be provided by the installing contractor and can be found online by searching the AHRI database at [www.ahridirectory.org/](http://www.ahridirectory.org/) or you can search by CEE Tier efficiency levels in the CEE database at [www.ceedirectory.org/](http://www.ceedirectory.org/).
